CY Tech Engineering Student – Computer Science | Seeking a 3-Year Apprenticeship Contract

PROFESSIONAL PROFILE

Engineering student at CY Tech, I am building my career around software development, data, and artificial intelligence. I enjoy turning technical challenges into concrete solutions — whether through APIs, web applications, or AI and data projects. I am looking for a 3-year apprenticeship on a 2-weeks-on/2-weeks-off schedule to keep learning in the field and contribute to meaningful, technically driven projects.

EDUCATION

CY Tech – Computer Science Engineering Program (Apprenticeship, AFi24) 2026 – 2029
Bachelor's in Computer Science (BUT) – Université Sorbonne Paris Nord (3rd year, Apprenticeship) 2023 – 2026
Scientific Baccalaureate – Highest Honors 2023

PROFESSIONAL EXPERIENCE

Apprentice Developer | CY Cergy Paris Université, France *September 2025 – Present*

- Development and automation of internal business processes using Gargantua (Java, JavaScript).
- User role and rights management, process configuration within the administration tool.
- Cross-team collaboration to accurately address end-user needs.

Developer Analyst Intern | ReeWayy SAS, France *January 2025 – March 2025*

- API design with Django REST Framework, bug resolution system optimization, and unit testing.

CS Tutoring | IUT de Villeteuse, France *September 2025 – Present*

- Supporting students through lab sessions and projects, explaining complex technical concepts.

Cashier | ACTION, France *April 2025 – Present*

- Efficient cash handling, queue management, customer service, and teamwork.

PROJECTS

AI & Mobile (CNN): Designed a mobile application integrating CNNs for image analysis (age estimation, gender detection, visual attributes). Model training and integration into a mobile app for real-time processing.

Generative AI (LLM/RAG): Built a chatbot using LLMs with a RAG architecture. Integration of external documents to generate contextualised, relevant responses.

Data Analysis & Processing: Developed a web/mobile app for real-time tracking of Vélib' bike-sharing stations via REST API. Data processing and visualisation of bike availability.

Web Development: Built a web application for managing a full recruitment workflow (candidates, job listings, applications) with a frontend/backend architecture and database.

TECHNICAL SKILLS

AI & Data Science: Neural networks (CNN, MLP, RNN), Python (pandas, NumPy), Kaggle, Google Colab, Jupyter Notebook, Data Visualisation

Programming: Python, Java, C, Assembly

Web & Mobile: HTML, CSS, JavaScript, jQuery, PHP, Next.js, TypeScript, React, Spring Boot, Android, Flask, Django

Databases & APIs: MySQL, PostgreSQL, MariaDB, REST API (Design, Swagger, Postman)

Systems & Tools: LAMP, TCP/IP, Virtualisation, Git, GitHub, UML, VS Code, IntelliJ, Microsoft Office

LANGUAGES, QUALITIES & INTERESTS

Languages: French (Bilingual) | English (CLES B2) | Kabyle (Native) | Arabic (Bilingual)

Qualities: Adaptability, Team spirit, Organisation, Ambition, Rigour, Autonomy, Communication, Analytical mindset

Interests: Travel, Cinema (Sci-Fi), Music, Reading
